

**Solfa
Power
Limited**

WHO ARE WE

Energy poverty is a menace that has inhibited Africa's development and Solfa Power Limited (SPL) exist to bridge this energy gap by providing clean, sustainable, affordable, inclusive and innovative energy solutions that are designed to meet variety of energy needs across different sectors of the society.

At Solfa Power, providing energy solutions is not just a business, it is a passion fueled by the desire to impact our world by ensuring that our customers lead productive, healthy and convenient lives with our products and services

VISION

To become a leading global clean energy company providing a range of products and services that solve an array of energy problems, reduce carbon emissions and promote economic development.

MISSION

To champion the energy transition by providing innovative and affordable energy solutions through a motivated team to our customers, whilst maintaining the highest standard of quality, excellent customer service and efficient execution/delivery of our products and services

Our Products & Services

Solar System Installations

Our team of professionals provide turnkey solar system installations for small businesses, offices, companies and industries from the point of data-driven energy audits, demand management, system design, engineering/installation, commissioning and maintenance services. Whatever the size of your home or business, Solfa power has a solar package that is tailored fit and well suited for your budget.

Our Products & Services

Energy as a Service

For industries, estates and other maximum demand energy users, we meet your energy needs with our hybrid solar energy solutions that guarantees 24hours uninterrupted power supply with no down time at zero upfront costs. You are only required to pay a monthly tariff which is lower than the monthly cost of diesel generator and grid power.

Our system is very portable, thanks to the fact that all the mechanisms are integrated in a shipping container and the connection /disconnection is a plug and play system that takes place in a few minutes.

About the Founder:

Chinenye Ajayi

 chinenyeajayi@outlook.com

 <https://www.linkedin.com/in/chinenyeajayi/>

Chinenye Ajayi is an energy professional and a seasoned commercial lawyer with over a decade experience in the energy sector. She is passionate about achievement of the SDG7(clean, affordable and reliable energy) and the need to end energy poverty in Africa, hence the vision to set up Solfa Power.

In addition to providing legal and business advisory services to clients within the renewable energy space, Chinenye is one of the coordinators of the **African Fellowship of Young Energy Leaders(AFYEL)**, an education venture designed by the **Renewable Energy Technology Training Institute (RETTI)** to invest into the next generation energy leaders who will deliver a sustainable access to energy and ultimately a zero carbon Africa. She also advises on the Project Committee and the Capacity Development Committee of **ReEnergy Africa**, a non-profit organization that seeks to raise awareness, implement solutions for inclusion and create a community for renewable energy accelerators.

Chinenye and her technical team bring to bear their wealth of experience in providing top notch energy solutions to individuals, SMEs and large organisations.
